NOVEMBER 2013

NEW COMMODITY!

KIMBERLY CLARK 300 STERLING NITRILE GLOVES

Made of synthetic rubber that is safe for people with latex allergies, Nitrile gloves are considered one of the strongest types of disposable gloves available. Because they contain no latex proteins, they are more puncture resistant. Beyond withstanding wear and tears effectively, they also provide superior resistance to many types of chemicals.

KC300 Sterling Nitrile Exam Gloves provide an excellent fit and feel. The KC300 gloves feature an Acceptable Quality Level (AQL) of 1.0.

Standard length KC300 Sterling Nitrile Exam Gloves come in space saving 200 count dispenser boxes. That means up to a 50% saving in the storage space buyers usually devote to gloves.

2,000 gloves per case.

1-10 cases are \$164.82 each
11+ cases are \$164.24

BRAND YOUR AGENCY WITH STYLE

Custom multidimensional sandblasted signs, awards and promotional materials are all available through RESPECT in all shapes and sizes.

Sandblasted signs are groove routed in 1.25 inches thick, clear Redwood that offers an impressive, multidimensional presentation that can be used for just about anything--indoors and outdoors. The artistic technique is used to display business logos, interpretation displays, shields and as custom architectural features. Quality craftsmanship ensures longevity, and the colorfully rich results are both eye catching and stylish.

For indoor applications, the sandblasted technique reveals routed grooves in a lightweight, high density foam that is 1.5 inches thick. Similar to the wood signs, these indoor signs provide exciting, multidimensional custom designs. The technique shines when used for signs. It also makes artistic awards, plaques and promotional materials that are both memorable and beautiful.
